

Garment Pattern Maker V5

Browser QA shirt / Size L

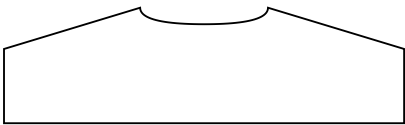

DEMO ONLY - Not production certified. Preview is not a full-scale cutting template.

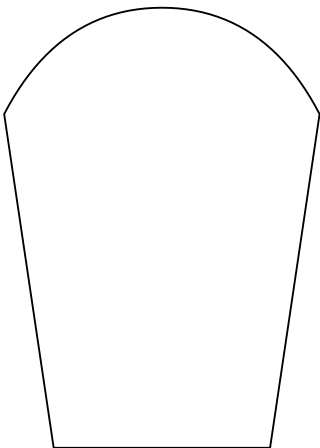

Front - Cut 2

Back - Cut 1

Yoke - Cut 1

Sleeve - Cut 2

Collar - Cut 2

Collar Stand - Cut 2

Cuff - Cut 4

Sleeve Placket - Cut 2

Demo profile only; client base blocks and physical sample calibration are not supplied.

Body widths allocate half of each flat half-body measurement to each front/back half.

Source shoulder-to-cuff sleeve length includes cuff; sleeve body subtracts cuff width.

Curves use sampled quadratic construction with 24 segments; no shrinkage or additional ease.

Back neck drop is 2 cm. Collar attachment follows generated neckline, not a certified collar block.

Front placket is a center-front extension using the explicitly resolved source width.

Collar point and center-back height use source values; buttoned length and outside edge are checked against source as calibration targets.

Back and yoke are unfolded before nesting. Grain follows the vertical piece axis; no rotation.

Seam allowance defaults to zero. Positive allowance is a polygon offset, not a manufacturing standard.

Pocket omitted because no pocket dimensions are supplied. Sleeve cap mismatch remains a visible warning.

PASS: Front: closed outline, positive area, no self-intersection

PASS: Front: 0 zero-length edges

PASS: Front: notch placement verified

PASS: Front: grainline is contained and oriented

PASS: Back: closed outline, positive area, no self-intersection

PASS: Back: 0 zero-length edges

PASS: Back: notch placement verified

PASS: Back: grainline is contained and oriented

PASS: Yoke: closed outline, positive area, no self-intersection

PASS: Yoke: 0 zero-length edges

PASS: Yoke: notch placement verified

PASS: Yoke: grainline is contained and oriented

PASS: Sleeve: closed outline, positive area, no self-intersection

PASS: Sleeve: 0 zero-length edges

PASS: Sleeve: notch placement verified

PASS: Sleeve: grainline is contained and oriented

PASS: Collar: closed outline, positive area, no self-intersection

PASS: Collar: 0 zero-length edges

PASS: Collar: notch placement verified

PASS: Collar: grainline is contained and oriented

PASS: Collar Stand: closed outline, positive area, no self-intersection

PASS: Collar Stand: 0 zero-length edges

PASS: Collar Stand: notch placement verified

PASS: Collar Stand: grainline is contained and oriented

PASS: Cuff: closed outline, positive area, no self-intersection

PASS: Cuff: 0 zero-length edges

PASS: Cuff: notch placement verified

PASS: Cuff: grainline is contained and oriented

PASS: Sleeve Placket: closed outline, positive area, no self-intersection

PASS: Sleeve Placket: 0 zero-length edges

PASS: Sleeve Placket: notch placement verified

PASS: Sleeve Placket: grainline is contained and oriented

PASS: Yoke seam: 48.50 cm vs 48.50 cm; tolerance 0.01 cm

PASS: Collar attachment: 45.85 cm vs 45.85 cm; tolerance 0.01 cm

WARNING: Sleeve cap / armhole: 54.86 cm vs 34.47 cm; tolerance 2.0 cm

WARNING: Buttoned collar length: demo span 45.85 cm vs source 43.00 cm. Calibrate before cutting.

WARNING: Collar outside edge: demo span 45.85 cm vs source 44.50 cm. Calibrate before cutting.

WARNING: Demo drafting profile. Production calibration and physical fit validation are required.
